

Deliver Student Information to Parents and Guardians via the Web using Clarity IT Advisors' Parents' Gateway

Try it NOW <https://parents.clarityitadvisors.com>

Our Parents' Gateway provides parents and guardians with access to key information about their children via a web browser using a secure web site.

At any time of the day or night parents can login and access timetable, medical, behaviour, subject and attendance information.

Our gateway uses SharePoint, available free of charge from Microsoft, as the base platform to allow you to easily add documents, announcements, discussions and 3rd party web parts at no extra cost.

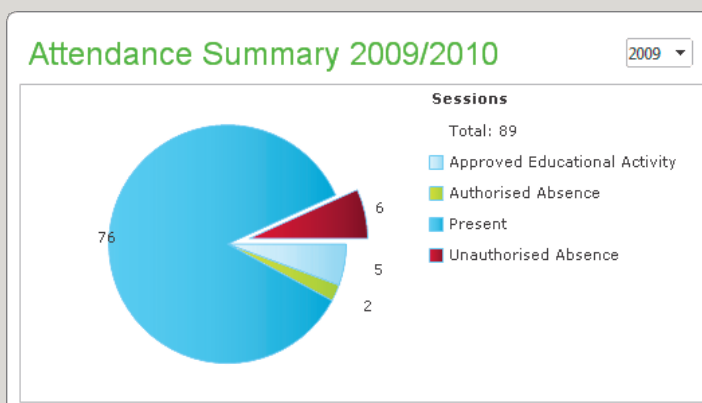

Displayed Information

The information displayed to parents is broken down into simple categories. The General page shows basic information such as the student's address, admissions number, tutor, doctor, medical notes, behaviour related incidents and SEN assessments.

Attendance Data

Attendance data is split into two sections; a graphical summary and detailed day-by-day. Parents can choose which year they wish to view and important attendance events are automatically highlighted as shown in this example.
